1. EXECUTIVE SUMMARY

The business shows strong revenue and profit growth (~50%), primarily driven by core markets (APAC, EU) and the Technology category.

However, margin improvement remains limited, indicating growth is driven by scale rather than efficiency.

Market performance is uneven, with clear opportunities in high-growth regions and underperformance in others.

Strategic focus should be on scaling high-performing markets and categories while improving operational efficiency in weaker segments.

2. MARKET INSIGHTS

Key Findings

- APAC is the primary revenue and profit driver, showing strong and stable performance.
- EU demonstrates solid growth but requires margin optimization.
- US and LATAM contribute significantly but show slower growth → **mature markets**.
- EMEA shows the highest growth potential despite smaller scale → **emerging opportunity**.

Issues

- LATAM profitability is relatively low compared to its revenue contribution.
- Smaller markets (EMEA, Africa, Canada) have limited current impact but vary in growth potential.

👉 Strategic Insight

Growth opportunities lie in scaling EMEA while maintaining dominance in APAC and EU.

US and LATAM should be managed for efficiency rather than aggressive expansion.

3.PRODUCT INSIGHTS

Key Findings:

- Technology is the core product category, contributing the highest revenue and profit.
- Office Supplies provides stable performance and supports overall cash flow.

Issues:

- Furniture underperforms with relatively low profitability.

Recommendations:

- Focus on Technology, especially high-performing sub-categories.
- Maintain Office Supplies as a stable category.
- Optimize costs or reduce investment in Furniture.

STRATEGIC DIRECTION

Expansion Strategy

- Prioritize expansion in **APAC and EU** (strong base + scale)
- Selectively invest in **EMEA** as a high-growth emerging market
- Focus on **Technology category** as the primary growth engine

Optimization Strategy

- Improve margin in **EU and LATAM**
- Optimize **Furniture category** (cost, pricing, supply chain)

Risk Management

- Monitor return rate and operational efficiency
- Avoid aggressive expansion in underperforming markets (LATAM) until profitability improves
